

José Ángel Gaytán Pérez

Technical Lead | .NET | AI-Assisted Development

Apodaca, Nuevo León · Mexico · GitHub / LinkedIn available in portfolio

Technical Lead and .NET developer experienced in coordinating teams of up to 6 people, modernizing legacy systems and automating business-critical processes. I currently lead a team of 5 developers, drive GitHub and CI/CD adoption, and apply AI to accelerate delivery, capture knowledge and improve software quality. I also build SWIPY, an independent SaaS product used by a real business.

PROFESSIONAL EXPERIENCE

Technical Lead

Technical leadership

Préstamo Express · Apr 2023 - Present

- Lead a team of 5 developers and make technical decisions for business-critical systems used by support, accounting, branches and point-of-sale operations.
- Replaced FTP-based source sharing with a collaborative Git and GitHub workflow; we later automated builds, versioning and packaging with GitHub Actions, enabling the department to scale from one developer to a full team.
- Designed a Python ETL for the SIPE - VINO migration that processes 2-3 GB per branch and reduced an estimated 12-hour run to 20 minutes.
- Unified catalog preparation and migration into one solution and added a reconciliation dashboard that compares record-level data and totals between the old and new databases before closing a migration.
- Introduced AI coding agents to accelerate delivery and helped bring in-house within 6-8 months a system that had depended on external consulting for years; I also built an internal assistant for querying documentation and business workflows.

Product Engineer · Independent Project

SaaS product

SWIPY POS · 2023 - Present

- Designed and built an end-to-end .NET 8 SaaS point-of-sale product currently used in the daily operation of one store and available for public download.
- Implemented premium features, live Mercado Pago transactions and a multi-business administration dashboard under production validation.
- Built issue-reporting and automatic-update workflows that removed manual remote installations: I can diagnose, fix and release a new version through a centralized process.
- Consolidated sales, inventory and administration into one application designed to reduce errors and simplify store operations.

PROFESSIONAL EXPERIENCE · CONTINUED

Technical Project Manager

Technical coordination

APD SA de CV · Sep 2021 - Sep 2022

- Technically coordinated 4-5 software projects over one year, leading a team of up to 6 developers.
- Consolidated scattered code and documentation into GitHub repositories, establishing version control and traceability to support project continuity.
- Tracked scope, schedules, risks and deliverables from technical planning through production release.

Systems Analyst

Operations and data

SuKarne · Apr 2019 - Oct 2021

- Automated production-close data extraction and migration, reducing a manual process from approximately 2 hours to 10-20 minutes.
- Analyzed and traced operational information for production and accounting, resolving data incidents and supporting daily closing activities.
- Provided ongoing plant operations support across SQL, computers, printers, cameras and PLCs to resolve failures and maintain operational continuity.

TECHNICAL SKILLS

Leadership & delivery	Technical Leadership · Team Management · Project Management · System Design · Legacy Modernization
Development	C# · .NET · ASP.NET MVC · Python · REST APIs · Angular · Vue.js · Visual Basic
Platform & data	SQL Server · Git · GitHub · GitHub Actions · CI/CD
Applied AI	AI-Assisted Development · AI Agents · Knowledge Assistants · Codex · Claude

SELECTED PROJECTS

SWIPY POS	.NET 8 SaaS point of sale with payments, premium features and automatic updates.
PEX Evaluator	Available-inventory lookup across branches to support commercial decisions.
SIPE - VINO	Legacy migration continuity with data reconciliation, monitoring and difference control.

EDUCATION AND CERTIFICATIONS

B.Eng. in Computer and Administrative Systems · Universidad Juárez del Estado de Durango (UJED)

Bachelor's degree · Cisco Certified Network Associate (CCNA)

PROFESSIONAL STRENGTHS

Technical leadership · Team coordination · Business communication · Decision-making
